

Press Release

Waste Management Odor Elimination in Retailers near You!

April 21, 2016, Houston, Texas

Waste Management in partnership with SciCorp International Inc., announces the launch of a new odor eliminating spray. A key attribute of the solution is that it helps homeowners and businesses overcome odor issues that make home composting and waste handling difficult.

With food waste and garbage pickup going to every two weeks in many areas, homeowners are now dealing with lingering odors that attract flies and animals. The goal was to develop a powerful and eco-friendly solution that not only solved odor issues, but was easy to use.

SciCorp developed an entirely natural solution, "It works with the natural components of waste to get at the root causes of odor. The initial intent was to speed up the composting of waste and instantly eliminate the odors, but a great side benefit was that flies and animals were no longer attracted to that waste" says Derk Maat, founder and CEO of SciCorp International and lifetime environmentalist.

This combination of safe and effective methodologies aligns perfectly with Waste Management's role as a leading environmental solutions provider.

The resulting retail product is an extremely powerful odor eliminating spray ranging in price from \$6.99 - \$19.99 depending on the product size. Waste Management odor eliminating spray is being introduced at the National Hardware Show on May 4 – 6 in Las Vegas and will be available at leading retailers from club and grocery to home improvement and mass market as early this summer.

ABOUT WASTE MANAGEMENT
