

PORTABLE TOILET TREATMENT

BIOLOGIC® SR2

THE CHALLENGE

Improve solids breakdown, eliminate odors.

OUR SOLUTION

Adding of BIOLOGIC SR2 to a portable toilet has been demonstrated to significantly reduce odors by reducing the generation of H₂S and other odors.

OUR PRODUCT

BIOLOGIC SR2 is a micronutrient supplement containing a proprietary blend of natural biodegradable vitamins and trace mineral specifically engineered to stimulate desirable, naturally occurring bacteria present biological waste.

THE TREATMENT

Employing BIOLOGIC SR2 in your portable toilet will eliminate odors, break down solids and reduce BOD.

Under typical bio-waste treatment conditions, the absence of these micronutrients are frequently the limiting factor for the growth and activity of bacteria. With the addition of BIOLOGIC SR2 the biological pathways are no longer inhibited and as a result, biological activity and metabolism is substantially increased resulting in accelerated breakdown of organic solids, fats, oils and greases.

APPLICATION PROTOCOL

BIOLOGIC® SR2 is added to portable toilet at 25 ml post toilet pump out..

TYPICAL RESULTS

ELIMINATES ODOR

- Reduces hydrogen sulfide (H₂S)
- Reduces ammonia

IMPROVES TOILET PERFORMANCE

- Reduces BOD

REDUCES COST

- Lower dumping fees

SCICORP INTERNATIONAL CORP.

BIOLOGIC® SR2

- + Limited Capital Cost for Treatment
- + No Special Handling or Application Restrictions
- + Eco-Friendly
- + Long Shelf Life

NO Masking Agents
NO Bacteria
NO Enzymes
NO Toxic Chemicals
