SCICORP INTERNATIONAL CORP.

## BIOLOGIC™ SR2

- Limited Capital Cost for Treatment
- No Special Handling or Application Restrictions
- Eco-Friendly
- Long Shelf Life

NO Masking Agents  
NO Bacteria  
NO Enzymes  
NO Toxic Chemicals

# POULTRY HOUSES

## Odor Control

### BIOLOGIC™ SR2

#### THE CHALLENGE

**Cost effective odor/ammonia control.**

#### OUR SOLUTION

Adding BIOLOGIC™ SR2 to poultry house waste will result in a more rapid decomposition of organic matter and will eliminate odorous compounds resulting in an overall healthier environment for animals and workers.

#### OUR PRODUCT

BIOLOGIC™ SR2 is a micronutrient supplement containing a proprietary blend of natural biodegradable vitamins and trace minerals specifically engineered to stimulate desirable, naturally occurring bacteria present in solid waste systems reducing air borne odors and improving waste decomposition.

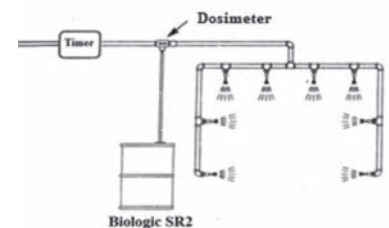

#### THE TREATMENT

Using BIOLOGIC™ SR2 in your poultry house operation will help reduce odor and accelerate the decomposition process.

Under typical animal waste treatment conditions, these micronutrients are frequently the limiting factor for the growth and development of desirable bacteria. With the addition of BIOLOGIC™ SR2, biological activity and metabolism is substantially increased, limiting the generation of odors and ammonia.

#### APPLICATION PROTOCOL

- Install nozzles directly under or above the poultry cages
- BIOLOGIC™ SR2 should be sprayed onto all waste material
- For large poultry houses, an optional pump can be installed to increase head pressure
- Dilute product 500:1 prior to application

#### THE RESULTS

##### INCREASES POULTRY HEALTH

- Accelerates microbial growth
- Reduces manure solids
- Improves poultry waste composting

##### ELIMINATES ODOR

- Reduces hydrogen sulfide (H<sub>2</sub>S)
- Reduces ammonia
- Improves public relations
- Improves workplace conditions
