

Biodiversity Policy

SciCorp acknowledges the critical role of biodiversity in sustaining ecosystems and enhancing our business operations. As a manufacturer of environmentally friendly products, we are committed to contributing positively to biodiversity through our processes, supply chain, and the performance of our products in the market.

Scope

This applies to all SciCorp operations, including:

- Manufacturing processes at our facility.
- Raw material procurement and supply chain management.
- Client interactions, particularly with industries reliant on organic wastewater treatment.

Objectives

- Promote positive biodiversity impacts through the use of SciCorp's product in wastewater treatment plants.
- Support biodiversity conservation and enhancement in our supply chain and operational practices.
- Engage employees, clients, and stakeholders in biodiversity initiatives.
