

Emissions and Climate Change Policy

SciCorp is committed to mitigating emissions and addressing climate change in alignment with leading sustainability standards.

By focusing on proactive strategies, we aim to support environmental health and contribute to global climate goals while maintaining operational excellence.

Scope

This applies to all aspects of SciCorp's operations, including production, administration, and product life cycle management, as well as interactions with clients, suppliers, and stakeholders.

Objectives

- **Minimize Greenhouse Gas Emissions:** Leverage existing non-emitting and non-polluting product characteristics to maintain and enhance low-emission practices.
- **Energy Efficiency:** Optimize energy use in all operations to minimize environmental impact.
- **Sustainability:** Meet throughout our offices and manufacturing operations our emissions reduction and climate goals using environmentally friendly products.
- **Regulatory Compliance:** Ensure compliance with all applicable local and international climate regulations and sustainability standards.
