

# Information Security and Cybersecurity Policy

---

SciCorp is committed to protecting its information assets, ensuring data confidentiality, integrity, and availability while safeguarding against cybersecurity threats. This establishes the framework for managing information security and cybersecurity risks.

## Scope

This applies to all SciCorp employees, contractors, suppliers, and business partners who access or manage SciCorp's information systems, networks, or data. It encompasses all information assets, including digital, physical, and cloud-based systems.

## Objectives

- Protect SciCorp's information systems and data from unauthorized access, disclosure, alteration, or destruction.
- Ensure compliance with applicable legal, regulatory, and contractual information security requirements.
- Promote a culture of cybersecurity awareness and accountability.
- Establish robust mechanisms for detecting, responding to, and recovering from cybersecurity incidents.
