

## Waste and Circularity Policy

---

SciCorp is committed to promoting waste reduction and circularity in its operations and products. It is aligned with leading sustainability standards.

By embedding circular principles into our processes, we aim to minimize environmental impact and enhance resource efficiency.

### Scope

This applies to all SciCorp operations, including production, administration, and interactions with stakeholders such as clients, suppliers, and the community.

### Objectives

1. **Reduce Waste Generation:** Minimize waste in all operations through efficient practices and innovative solutions.
2. **Promote Circular Economy:** Enhance the lifecycle of materials and products by adopting reuse, recycling, and recovery strategies.
3. **Engage Stakeholders:** Partner with clients and suppliers to foster circularity throughout the value chain.
4. **Regulatory Compliance:** Adhere to all applicable local and international regulations on waste management and circularity.
