

Water and Energy Efficiency Policy

SciCorp is committed to implementing and maintaining sustainable water and energy management practices. Our policy reflects our commitment to compliance with relevant sustainability standards.

Our efforts are designed to support both local and global clients while ensuring environmental stewardship through efficient resource use.

Scope

This applies to all SciCorp operations, including production, administration, and interactions with clients.

Objectives

1. Minimize water and energy usage throughout operations.
2. Support the achievement of green building certifications, including BOMA BEST® and LEED®.
3. Foster a culture of sustainability among employees and clients.
4. Reduce operational costs through conservation practices.
